SEABOARD CONSTRUCTION CO. WINS NATIONAL AWARD FOR QUALITY IN ASPHALT PAVING

Lanham, Md. — The National Asphalt Pavement Association (NAPA) announced today that Seaboard Construction Co. of Brunswick, Ga., has won a 2014 Quality in Construction Award for excellence in construction of an asphalt pavement. The company received its award on Wednesday, January 28, at a ceremony during the association's 60th Annual Meeting in Marco Island, Fla.

"Quality pavements are something every road builder strives to construct. We want to build pavements that deliver on the promise of high performance and drivability for the public," said William C. Ensor III, NAPA 2014 Chairman. "Projects that earn a Quality in Construction Award have been measured against industry best practices designed to live up to that promise. I'm proud to say that, in earning a 2014 QIC Award, Seaboard Construction Co. has met or exceeded these rigorous quality standards."

Seaboard Construction Co. won the award for their rehabilitation of Brunswick Golden Isles (BQK) Airport in Brunswick, Ga. The work included repaving the runway 7/25, taxiway A, and the associated connectors. Seaboard Construction Co. worked in 30 ten-hour shifts, and utilized cutting edge 3D modeling of the project to utilize GPS millimeter paver controls. The final project resulted in an ultra-smooth airport job which will serve the neighborhood for years to come.

###

The National Asphalt Pavement Association (NAPA) is the only trade association that exclusively represents the interests of the asphalt producer/contractor on the national level with Congress, government agencies, and other national trade and business organizations. NAPA supports an active research program designed to improve the quality of asphalt pavements and paving techniques used in the construction of roads, streets, highways, parking lots, airports, and environmental and recreational facilities. The association provides technical, educational, and marketing materials and information to its members; supplies product information to users and specifiers of paving materials; and conducts training courses. The association, which counts more than 1,100 companies as members, was founded in 1955.
